1. This Office action is in response to amendment filed 17 June 2005, which papers have been placed of record in the file.

2. Claims 1-5, 7-14, and 16-18 are allowed over the prior art of record. The following is an examiner's statement of reasons for allowance:

Claims 1 and 10 are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose a disk drive and a method of attenuating excitation of at least one arm vibration mode in a disk drive comprising the second secondary actuator is coupled to a second side of the actuator arm, and a second linkage extends along the second side of the actuator arm and couples the second secondary actuator to the second suspension, as presented in the environment of claims 1 and 10. It is noted that the closest prior art, Murphy, shows the first secondary actuator is coupled to a first side of the actuator arm, and a first linkage extends along the first side of the actuator arm and couples the first secondary actuator to the first suspension. However, Murphy fails to disclose the second secondary actuator is coupled to a second side of the actuator arm, and a second linkage extends along the second side of the actuator arm and couples the second secondary actuator to the second suspension as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
